

As a listener of FM radio, I am aware of the advertising nature of radio. As such, I find that most Radio stations play 20-40 minutes worth of advertisements per hour. This is more than I like. Airl FM Station 90.1 in my community does not play advertisements and is very entertaining. LPFM stations in my area provide offensive and almost pornographic music on the FM station 90.1, if Airl is displaced. In the last week Airl was the only station to broadcast Flood Watch Warning. Not even the TV stations provided this information, and it was very timely and helpful.
